11-3-2016

To whom it may concern

**Criomec SA**

I confirm that I have dealt with CRIOMECC SA in 2016, during which time they have supported our construction and commissioning team with excellent support in areas with a wide range of activities, such as mechanical support, piping erection, steel structure, electrical and general services. Their work has been a major factor in accelerating progress.

Regardless the late moment that CRIOMECC SA was called to Site, their Safety orientations were remarkable. CRIOMECC SA showed to be a high disciplined company where their employees have a high level of awareness in regard to safety, not only for them self, but also to others.

Safe instructions were followed at once and immediately implemented. The spontaneous questions and toolbox talks in case of undesired events, even when these was not caused by them, showed a high level of safety awareness.

During preparing the construction site for final hand over to the client, CRIOMECC SA assist Site HSE proactively and supported Site HSE to get the highest level of safety.

I can confidently recommend CRIOMECC SA as a solid and reliable Contractor in regard to Safety, Safety Orientation and behavior

Yours faithfully

Klaus E. Treubrodt
